The phenomenon first observed in the 1935 tents and anted in QST by G2II, that is, the rapid increase in signal strength of signals at about sunrise time GT, was again noted this year by many stations. Deveral of the G's worked by W1BB and not heard or worked by other W/VE's were nabbed on the crest of this wave. It was extremely interesting to hear a weak signal come from behind the background suddeniy increase to RST 449 peak, and then fade out again suddenly. The duration of the peak was usually from five to twenty-five minutes. W2UK, working FA8BG on 28 mc ., made a sohedule for $1.75-\mathrm{mc}$. contact, which resulted in the first W. Africa $1.75-\mathrm{mc}$. QSO on record! W1BB hooked FA8BG the following night. Cooperation was generally splendid throughout the tests and all in all things went off smoothly. A blue printed copy of a complete test log as compiled by W1BB and containing more details is avsilable from him for cost of printing and mailing.

## The Festival of States

The St. Petersburg (Florida) Amateur Radio Club, in cooperation with the Junior Chamber of Commerce, handled over 2000 messages for visitors to the annual Featival of States, the week of March 28th-April 4th. A station was set up in a central location with a suitable sign across the front of the building housing the equipment. The apparatus consisted of a Skyrider receiver loaned by W4DBG, a $3.5-\mathrm{mc}$. transmitter and receiver loaned by W4CQD, R.M., and a rack and panel 'phone-c.w. rig loaned by W4BCZ, B.C.M. W4CQD managed the traffic activities and did a fine job of it. W4APU, Director, Southeastern Division A.R.R.I., handled much of the trafio from the Festival. A special DX message for Australia was handled direct to its destination by W4ANE. Many visiting hams were welcomed at the station and special credit is due W8MKI for assistance in operating when club members were unable to be present. The effect of the exhibit was to give the public a new conception of what amateur radio really isother than "the pest next door who causes all the QRM".

## DX Notes

FROM W9HUV and W9ELA comes the information that ex-CT2BK is now on the air in Bolivia signing CP1AA. He will be found in his old CT2BK spot, "right on the edge," $14,000 \mathrm{kc}$. or on $14,450 \mathrm{kc}$. . . . A unique four-leg 'phone contact took place on March 8th. VK2BQ, Sydney, Australia worked G6XQ, G6XQ worked KA1AN, KA1AN worked G5NL, G5NL worked back to VK2BQ. This QSO lasted 40 minutes and was $100 \%$ readable all around. . . . ZL2JU advises that QSL cards for GTCP, the S.S. Thistleolen, may be sent to the operator, R. R. Rogers, 50 Holloway Road, Holloway, London N. 7. . . . Another four-way, on April 6th: DAARR-LU1EP-ZLIDV-W6JPW. This lasted san hour and a quarter, D4ARR acting as "master of ceremonies," each reporting to him and then in turn QSOing with each other. . . . A real record WAC- 44 minutea by W6KRI!
